

SGP-Lite

PRESENTATION

What is SGP-Lite?

SGP-Lite is an innovative application that allows you to manage documentation and technical content by using a Tablet (iOS™, Android™, Windows™ 8 and other mobile devices).

What is it used for?

SGP-Lite is a very useful tool that in a very simple and intuitive way facilitates and supports technical activities by:

- Consulting publications and technical documentation (manuals, parts catalogues, project specifications, safety and emergency procedures, diagrams, archives, etc.). The information and data you need whenever and wherever you need them!
- Displaying - in a very practical way and directly at your workplace - machinery, systems, equipment, modules, work instruments, etc. through high resolution photography, diagrams and drawings both in 2D and 3D.
- Navigating interactive training and multimedia content (technical descriptions, operating simulations, dynamic display of assembling/ disassembling procedures, etc.) integrated with technical documentation.

In addition to all the above, it is possible to manage and share all these functions on the web (by connecting to a company's documentation portal, web-based data bases, on-line training management systems, etc.).

Who needs it?

SGP-Lite is necessary to increase the efficiency and effectiveness of the following job profiles:

- Operators and technicians (electricians, mechanics, electronic technicians, etc.) who work on the systems both in the workshop and on board.
- Staff responsible for the design, development and maintenance of technical documentation.
- Marketing directors to present the company's products to their clients.

What are the advantages?

- Total portability of technical information and of training content.
- Maximum digitalization and integration of technical information (no paper, no volumes, no cupboards, no workstation).
- Maximum speed, accuracy and precision in accessing content.
- Light-weight hardware.
- Both local and network multimedia communication.
- Very simple (SGP Lite does not require any basic computer skills).
