

The NSE – NEW SPACE ECONOMY EUROPEAN EXPOFORUM is an international event which has been focused on the New Space Economy and its capability to promote and create new market opportunities and economic development in Europe.

Organized in collaboration with Space Foundation, NSE – NEW SPACE ECONOMY EUROPEAN EXPOFORUM has created an opportunity to meet and exchange views among existing and new industrial players, small and medium innovative companies, investors, venturers, startupper, research centers, space agencies and institutions with interests in space.

The sectors covered was:

- bio-sciences
- TLC
- logistics
- transportation
- environmental sustainability
- design creativity
- tourism
- exploration
- planetary exploitation
- innovation

In this occasion Se.Te.L. had the opportunity to present the historical core of his activities (ILS) and to show some of the innovative products resulting from funded projects (Agridrone and SCAMP Projects).
